ALWAYS BE THE LEADER IN CHINA MEDICAL CONSUMABLES AREA

Zhejiang Gongdong Medical Technology Co., Ltd. was found in 1985 in the developed coastal city Huangyan, Taizhou. It's specialized in manufacturing disposable medical testing products. After thirty-two years' efforts, it has become a well-known company in the field of medical and laboratory wares in China, and also the member unit of China Association for Medical Device Industry. Nowadays it is regarded as a leader in the field of disposable medical wares.

Following by the concept of promoting health care, relying on technological innovation, Gongdong improves its product's technology content constantly, to make sure to provide the safe and effective products to the people. Until now it has five big series of items, but more than 300 types of products.

In order to follow the market trend and seek a far-reaching development, Gongdong got ISO and CE certificates in 2001, and also started to do exportation in the same year. Based on its famous brand name and many years' development experience, Gongdong has made great achievements: It's vacuum tube, vaginal speculum and petri dish are highly enjoyed, particularly in the United States, Japan market; And it has built up a close business relation with some world-top 500 global corporations from medical treatment industry; Now, some famous global corporations from gene science and life field of science, start to cooperate with Gongdong, which makes Gongdong have further development in this advanced field of science.

Today, when the world economy develops steadily, but people requires more on medical and health care, which for sure pushes on development of medical research, diagnosis and supplies industries. It was just under this situation. Gongdong continues to be the leader in medical equipment industry.

While obtaining above great achievement, Gongdong also pay high attention to the talented, emphasizes on "People-Oriented, Team-Oriented", the employee of it understand well at it's policy "High Efficiency, High Quality, Development with Prosperity Together".

In future, Gongdong will redouble its' effort, keep improving products' technology and its' service, to develop more high-tech and new products, to contribute more to human being.

pursue innovation forever

motivity of Gongdong's development

Product research and development also requires technological innovation

Gongdong always takes improving the scientific and technological content of products, increasing investment in technological innovation and lifting products' independent research and development capability and art improvement ability as its the main objectives. And it pushes the Chinese medical consumable materials forward in a high level.

PULL ALL TOGETHER, AS QUALITY ALWAYS THE FIRST

Quality is the key to the success of an enterprise. Gongdong persists in top-down collaboration, which makes it possible for the quality to improve constantly and tend to be perfect.

High Quality High Efficiency development with Prosperity together

Efficiency stressing speed, character striving for quality and the harmonious unification of speed and quality, which create Gongdong's belief in high standards of products.

Gongdong has always adhered to this idea, so that it can walk in the forefront of medical consumables industry.

Serum Blood Collection Tube

Golden Vac™ serum blood collection tube promises to provide non-polluting and non-differential original blood specimen for medical test. After centrifugation, serum can be separated from blood cells and fibrin effectively. Serum tube includes 3 kinds of tubes: Plain Tube with red cap, Pro-coagulation Tube with red cap and Gel & Clot Activator Tube with yellow cap.

Serum (Plain) Tube

Plain Tube aims to obtain serum specimen for biochemistry, immunology and serology tests in clinical inspection. Its main merit is that serum separate out of blood cells and fibrin naturally, so its physico-chemical properties are keeping nonpolluted. The intact serum is suitable for a wide range of laboratory operation, routine clinical chemistry, immunology and serology.

Item	Specification	Qty/Cs
GD020A	Red cap, Plain 13*75mm, 2ml	1200
GD030A	Red cap, Plain 13*75mm, 3ml	1200
GD040A	Red cap, Plain 13*75mm, 4ml	1200
GD050A	Red cap, Plain 13*75mm, 5ml	1200
GD060A	Red cap, Plain 13*100mm, 6ml	1200
GD070A	Red cap, Plain 13*100mm, 7ml	1200
GD090A	Red cap, Plain 16*100mm, 9ml	1200
GD0100A	Red cap, Plain 16*100mm, 10ml	1200
GD090AR	Rubber stopper, Plain 16*100mm, 9ml	1200
GD0100AR	Rubber stopper, Plain 16*100mm, 10ml	1200

Serum (Clot Activator) Tube

Pro-coagulation Tube aims to obtain serum specimen, which is used for biochemistry and immunology tests. The interior wall is finely coated with coagulant which may promote the blood coagulation after collection. The appropriate amount of coagulant make blood coagulation in a relatively short time, avoiding potential hemolysis problem which caused by too rapid clotting. Finally, transparent serum can be separated after centrifugation.

Item	Specification	Qty/Cs
GD020CA	Red cap, Clot Activator 13*75mm, 2ml	1200
GD030CA	Red cap, Clot Activator 13*75mm, 3ml	1200
GD040CA	Red cap, Clot Activator 13*75mm, 4ml	1200
GD050CA	Red cap, Clot Activator 13*75mm, 5ml	1200
GD060CA	Red cap, Clot Activator 13*100mm, 6ml	1200
GD070CA	Red cap, Clot Activator 13*100mm, 7ml	1200
GD090CA	Red cap, Clot Activator 16*100mm, 9ml	1200
GD0100CA	Red cap, Clot Activator 16*100mm, 10ml	1200
GD090CAR	Rubber stopper, Clot Activator 16*100mm, 9ml	1200
GD0100CAR	Rubber stopper, Clot Activator 16*100mm, 10ml	1200

Gel & Clot Activator Tube aims to obtain high quality serum specimen for biochemistry, immunology and serology tests in clinical inspection, Inside the tube there is some gel present at the bottom, which is a pure substance and is very stable in physico-chemistry properties. Otherwise, the gel can avoid high-temperature decomposition and small molecules precipitation, hence it greatly reduces the risk of testing equipment clogging.

Gel & Clot Activator Tube

Gel & Clot Activator Tube

Item	Specification	Qty/Cs
GD040SGC	Yellow cap, Separate Gel+Clot Activator 13*75mm, 4ml	1200
GD040SGC2	Yellow cap, Separate Gel+Clot Activator 13*100mm, 4ml	1200
GD050SGC	Yellow cap, Separate Gel+Clot Activator 13*100mm, 5ml	1200
GD060SGC	Yellow cap, Separate Gel+Clot Activator 13*100mm, 6ml	1200
GD080SGC	Yellow cap, Sepearate Gel+Clot Activator 16*100mm, 8ml	1200
GD085SGC	Yellow cap, Sepearate Gel+Clot Activator 16*100mm, 8.5ml	1200
GD080SGCR	Rubber stopper, Separate Gel+Clot Activator 16*100mm, 8ml	1200
GD085SGCR	Rubber stopper, Separate Gel+Clot Activator 16*100mm, 8.5ml	1200

Whole Blood Collection Tube

Golden Vac™ whole blood collection tube promises to provide non-polluting and non-differential original blood specimen for medical test, doesn't require separation of plasma or cells. It includes 2 kinds of tubes: EDTA Tube with Purple cap, ESR Tube with black cap.

EDTA Tube

EDTA Tube is widely used for clinical haematology test, especially for routine blood examination. Our automatic sampling instrument finely and accurately spray additives onto the interior tube wall, to ensure the mixing speed and the anticoagulation effect. EDTA Tube is very convenient to use for it can be directly put on the analyzer to detect without opening the cap.

EDTA & Gel Tube

Item	Specification	Qty/Cs
GD020EK3	Purple cap, EDTA K3, 13*75mm, 2ml	1200
GD030EK3	Purple cap, EDTA K3, 13*75mm, 3ml	1200
GD040EK3	Purple cap, EDTA K3, 13*75mm, 4ml	1200
GD050EK3	Purple cap, EDTA K3, 13*75mm, 5ml	1200
GD060EK3	Purple cap, EDTA K3, 13*100mm, 6ml	1200
GD070EK3	Purple cap, EDTA K3, 13*100mm, 7ml	1200
GD080EK3	Purple cap, EDTA K3, 16*100mm, 8ml	1200
GD090EK3	Purple cap, EDTA K3, 16*100mm, 9ml	1200
GD0100EK3	Purple cap, EDTA K3, 16*100mm, 10ml	1200
GD080EK3R	Rubber stopper, EDTA K3, 16*100mm,8ml	1200
GD090EK3R	Rubber stopper, EDTA K3, 16*100mm, 9ml	1200
GD0100EK3R	Rubber stopper, EDTA K3, 16*100mm, 10ml	1200
GD020EK2	Purple cap, EDTA K2, 13*75mm, 2ml	1200
GD030EK2	Purple cap, EDTA K2, 13*75mm, 3ml	1200
GD040EK2	Purple cap, EDTA K2, 13*75mm, 4ml	1200
GD050EK2	Purple cap, EDTA K2, 13*75mm, 5ml	1200
GD060EK2	Purple cap, EDTA K2, 13*100mm, 6ml	1200
GD070EK2	Purple cap, EDTA K2, 13*100mm, 7ml	1200
GD080EK2	Purple cap, EDTA K2, 16*100mm, 8ml	1200
GD090EK2	Purple cap, EDTA K2, 16*100mm, 9ml	1200
GD0100EK2	Purple cap, EDTA K2, 16*100mm, 10ml	1200
GD080EK2R	Rubber stopper, EDTA K2 16*100mm, 8ml	1200
GD090EK2R	Rubber stopper, EDTA K2 16*100mm, 9ml	1200
GD0100EK2R	Rubber stopper, EDTA K2, 16*100mm, 10ml	1200
GD035EK3G	Purple cap, EDTA K3+Separate Gel, 13*75mm, 3.5ml	1200
GD060EK3G	Purple cap, EDTA K3+Separate Gel, 13*100mm, 6ml	1200
GD085EK3RG	Rubber stopper, EDTA K3+Separate Gel, 16*100mm, 8.5ml	1200
GD085EK3G	Purple cap, EDTA K3+Separate Gel, 16*100mm, 8.5ml	1200

ESR Tube

ESR Tube is mainly used for Erythrocyte Sedimentation Rate test, it contains buffered Sodium Citrate solution with the concentration of 3.8% (0.129mol/L). The mixing ratio of blood to Sodium Citrate is 4:1. It is suitable for the ESR tests for subjects of different gender and ages, with highly related coefficient comparing with the Westgren method..

Item	Specification	Qty/Cs
GD016SC	Black cap, ESR 13*75mm, 1.6ml	1200
GD024SC	Black cap, ESR 13*75mm, 2.4ml	1200
GD032SC	Black cap, ESR 13*75mm, 3.2ml	1200

ESR Tube

ESR Detector

Condition: Within 6 hours to finish the testing.
Lab temperature: 8 to 25°C

Instructions:
1. Put the ESR detector on the level place.
2. Using the ESR tube to collect the blood and mixing well.
3. Put the tube upright on the ESR detector. The tube blue graduation line flush with rack top.
4. Wait 60mins, then read the data that the level of blood go down.
Advantage:

GongDong ESR Fast Detector have a Particular organic glass structure that make the ESR tubes fixed fast and simply, promise it the perpendicular degree of the level direction, and can conveniently adjust the horizon of ESR tubes samples.

Item	Specification	Qty/Cs
GD016ESR	Rubber stopper, ESR Tube 8*120mm, 1.6ml	1200
GD0128ESR	Rubber stopper, ESR Tube 8*120mm, 1.28ml	1200
H1020A	ESR Fast Detector, for 8X120mm,1.6ml tube	10
H1020B	ESR Fast Detector, for 8X120mm,1.28ml tube	10
GD016ESRN	Rubber Stopper, ESR Tube, 9x120mm, 1.6ml	1200

Plasma Blood Collection Tube

Golden Vac™ plasma blood collection tube promises to provide non-polluting and non-differential original blood specimen for medical test. After centrifugation, plasma can be separated from blood cells effectively. Plasma tube includes 5 kinds of tubes: Clotting Tube with blue cap, Heparin Tube and Gel & Heparin Tube with green cap, Compound of Sodium Fluoride and Anticoagulant Tube with grey cap, Gel & EDTA Tube with lavender cap.

Coagulation Tube

Coagulation Tube aims to obtain plasma specimen for coagulation function test, it contains buffered Sodium Citrate solution with the concentration of 3.2%(0.109mol/L).The mixing ratio of blood to Sodium Citrate is 9:1. This anticoagulant is sustained and stable, it strictly control the microbial limit, Making sure the APTT test under the excellent Condition.

Item	Specification	Qty/Cs
GD018SC	Blue cap, Coagulation, 3.2% Sodium citrate 13*75mm, 1.8ml	1200
GD027SC	Blue cap, Coagulation, 3.2% Sodium citrate 13*75mm, 2.7ml	1200
GD036SC	Blue cap, Coagulation, 3.2% Sodium citrate 13*75mm, 3.6ml	1200
GD045SC	Blue cap, Coagulation, 3.2% Sodium citrate 13*75mm, 4.5ml	1200
GD018SCD	Blue cap, Coagulation, 3.2% Double wall 13*75mm, 1.8ml	1200
GD027SCD	Blue cap, Coagulation, 3.2% Double wall 13*75mm, 2.7ml	1200

Coagulation Tube(Glass Only)

Item	Specification	Qty/Cs
GD018SC-F	Blue cap, Glass tube,Coagulation, 10.25*64mm(flat bottom), 1.8ml	1000
GD027SC-F	Blue cap, Glass tube,Coagulation, 10.25*64mm(flat bottom), 2.7ml	1000

(Aluminium Plastic bag pack for each rack)

Heparin Tube

Heparin Tube aims to obtain plasma specimen, which is used not only for emergency biochemistry tests but also for blood rheology test. Inside the tube wall, where is well sprayed with lithium heparin or sodium heparin which is a kind of anticoagulant activating antithrombins to block the coagulation cascade reaction.

Item	Specification	Qty/Cs
GD030SH	Green cap, Heparin Sodium, 13*75mm, 3ml	1200
GD040SH	Green cap, Heparin Sodium, 13*75mm, 4ml	1200
GD050SH	Green cap, Heparin Sodium, 13*75mm, 5ml	1200
GD060SH	Green cap, Heparin Sodium, 13*100mm, 6ml	1200
GD070SH	Green cap, Heparin Sodium, 13*100mm, 7ml	1200
GD0100SH	Green cap, Heparin Sodium, 16*100mm, 10ml	1200
GD0100SHR	Rubber stopper, Heparin Sodium, 16*100mm, 10ml	1200
GD030LH	Green cap, Heparin Lithium, 13*75mm, 3ml	1200
GD040LH	Green cap, Heparin Lithium, 13*75mm, 4ml	1200
GD050LH	Green cap, Heparin Lithium, 13*75mm, 5ml	1200
GD060LH	Green cap, Heparin Lithium, 13*100mm, 6ml	1200
GD070LH	Green cap, Heparin Lithium, 13*100mm, 7ml	1200
GD0100LH	Green cap, Heparin Lithium, 16*100mm, 10ml	1200
GD0100LHR	Rubber stopper, Heparin Lithium, 16*100mm, 10ml	1200

Gel & Heparin Tube

Gel & Heparin Tube is a kind of anticoagulation tube, aims to obtain high quality plasma specimen for fast emergency biochemistry test. Lying at the bottom of the tube, there is some gel for separating plasma and blood cells, preventing substance from exchanging and keeping the obtained plasma from being blood cell polluted, thus the accuracy of the results will be improved. Otherwise, the specimen could be put into the equipment directly without transferring and kept stable in cold storage for 48hs, so that well meets the quality requirement of retest.

Item	Specification	Qty/Cs
GD030SHG	Green cap, Heparin Sodium+Gel, 13*75mm, 3ml	1200
GD040SHG	Green cap, Heparin Sodium+Gel, 13*75mm, 4ml	1200
GD050SHG	Green cap, Heparin Sodium+Gel, 13*100mm, 5ml	1200
GD085SHG	Green cap, Heparin Sodium+Gel, 16*100mm, 8.5ml	1200
GD030LHG	Green cap, Heparin Lithium+Gel, 13*75mm, 3ml	1200
GD040LHG	Green cap, Heparin Lithium+Gel, 13*75mm, 4ml	1200
GD050LHG	Green cap, Heparin Lithium+Gel, 13*100mm, 5ml	1200
GD085LHG	Green cap, Heparin Lithium+Gel, 16*100mm, 8.5ml	1200

Glucose Tube

Compound of Sodium Fluoride and Anticoagulant Tube aims to obtain highly stable plasma for blood glucose testing. Sodium Fluoride is a kind of inhibitor of glucose degradation, it has the function of repressing glucose metabolism and degradation. Optional Anticoagulant are Potassium Oxalate, EDTA and Heparin, they could prevent blood coagulation and avoid blood hemolysis. This particular compound additive realise that blood glucose specimen could be cold storage for a long time.

Item	Specification	Qty/Cs
GD020SFH	Gray cap, Sodium Fluoride+Heparin Sodium, 13*75mm, 2ml	1200
GD030SFH	Gray cap, Sodium Fluoride+Heparin Sodium, 13*75mm, 3ml	1200
GD040SFH	Gray cap, Sodium Fluoride+Heparin Sodium, 13*75mm, 4ml	1200
GD050SFH	Gray cap, Sodium Fluoride+Heparin sodium, 13*75mm, 5ml	1200
GD020SNA	Gray cap, Sodium Fluoride+EDTA Naz, 13*75mm, 2ml	1200
GD030SNA	Gray cap, Sodium Fluoride+EDTA Naz, 13*75mm, 3ml	1200
GD050SNA	Gray cap, Sodium Fluoride+EDTA Naz, 13*75mm, 5ml	1200
GD020SP	Gray cap, Sodium Fluoride+Potassium Oxalate, 13*75mm, 2ml	1200
GD030SP	Gray cap, Sodium Fluoride+Potassium Oxalate, 13*75mm, 3ml	1200
GD040SP	Gray cap, Sodium Fluoride+Potassium Oxalate, 13*75mm, 4ml	1200
GD050SP	Gray cap, Sodium Fluoride+Potassium Oxalate, 13*75mm, 5ml	1200
GD6001	Disposable ESR Pipette with prefilled (3.2% Trisodium Citrate) and capped filling tube 100pcs/box*10boxes	

Non Vacuum Blood Tube

Item	Specification	Qty/Cs
GDN050EK3	5ml EDTA K3 Non-vacuum blood collection tube, Green cap	1000
GDN050EK2	5ml EDTA K2 Non-vacuum blood collection tube, Green cap	1000
GDN050A	5ml Plain Non-vacuum blood collection tube, Red cap	1000
GDN050CA	5ml Clot Activator Non-vacuum blood collection tube, Red cap	1000
GDN050SP	5ml Fluoride Oxalate Non-vacuum blood collection tube, Yellow cap	1000
GDN050LH	5ml Lithium Heparin Non-vacuum blood collection tube, Dark Blue cap	1000

Micro Collection Tube

Micro Collection tube is mainly used for peripheral blood collection. It is specially suitable for small children and geriatric patient. The inner surface has an excellent hemorepellency where it is necessary for a good preparation of high quality blood sample.

Capillary Blood Collection Tube

Item	Specification	Qty/Cs
GD005A	Micro Collection tube, Plain, 0.5ml	1000
GD005CA	Micro Collection tube, Clot Activator 0.5ml	1000
GD005EK3	Micro Collection tube, EDTA K3, 0.5ml	1000
GD005EK2	Micro Collection tube, EDTA K2, 0.5ml	1000
GD005LH	Micro Collection tube, Heparin Lithium, 0.5ml	1000
GD005SH	Micro Collection tube, Heparin Sodium, 0.5ml	1000
GD005SFH	Micro Collection tube, Heparin Sodium +Sodim Fluoride, 0.5ml	1000
GD005SGC	Micro Collection tube, Gel+Clot Activator, 0.5ml	1000
GDNM005A	Micro tube (High Type) 0.5ml Plain 0.5ml	1000
GDNM005CA	Micro tube (High Type) 0.5ml Clot activator 0.5ml	1000
GDNM005EK3	Micro tube (High Type) 0.5ml EDTAK3 0.5ml	1000
GDNM005EK2	Micro tube (High Type) 0.5ml EDTAK2 0.5ml	1000
GDNM005LH	Micro tube (High Type) 0.5ml, Gel 0.5ml	1000
GDNM005SGC	Micro tube (High Type) 0.5ml, Gel 0.5ml	1000
GDNM005SFH	Micro tube (High Type) Glucose(Heparin sodium,/ Sodium Fluoride) 0.5ml	1000

Item	Specification	Qty/Cs
GDC005A	Capillary Blood Collection tube, Plain, 0.5ml	1000
GDC005CA	Capillary Blood Collection tube, Clot Activator, 0.5ml	1000
GDC005EK3	Capillary Blood Collection tube, EDTA K3, 0.5ml	1000
GDC005EK2	Capillary Blood Collection tube, EDTA K2, 0.5ml	1000
GDC005LH	Capillary Blood Collection tube, Heparin Lithium, 0.5ml	1000
GDC005SH	Capillary Blood Collection tube, Heparin Sodium, 0.5ml	1000
GDC005SFH	Capillary Blood Collection tube, Heparin Sodium+Sodim Fluoride, 0.5ml	1000
GDC005SGC	Capillary Blood Collection tube, Gel+Clot Activator, 0.5ml	1000

Sharps Container

For sharp container of 3L, 5L, 7L, two kinds of caps are both available.

Item	Specification	Qty/Cs
GDC-01-F	Sharp container, Flip+Ype closure 1L	60
GDC-03-F	Sharp container, Flip+Ype closure 3L	48
GDC-03-X	Sharp container, Rotary+Ype closure 3L	48
GDC-05-F	Sharp container, Flip+Ype closure 5L	32
GDC-05-X	Sharp container, Rotary+Ype closure 5L	32
GDC-07-F	Sharp container, Flip+Ype closure 7L	24
GDC-07-X	Sharp container, Rotary+Ype closure 7L	24
GDC-013-X	Sharp container, Rotary+Ype closure 13L	20

Item	Description of Goods	Cs size	Qty/Cs

Urine specimen collection

It is for the collection of urine specimen. It is made of medical plastic and designed in humanization with thick and even wall. It can form the closed collection, transportation and testing of urine, which has solved a series of problems, such as urine specimen submission, supporting the use of computers, pollution and so on.

- The product use is clean, convenient and safe, which provides a guarantee for the normalization and standardization of urine analysis from the source.

Petri dish & loops

SYSTEM

The Gongdong Petri dish series are made of imported polystyrene with high quality as raw material. Its smoothness and transparent finish fully achieve the International standard of similar product. It is produced in a 100 thousand stage purification plant where there is no heat source and sterilized by ethylene oxide. Adopt the internationally popular easy tear package, which is simple and convenient and reduce the pollution opportunities in the use of products. Each batch of products is evaluated by growth status observation, test of cell growth rate, test of cell adherence strength, pyrogenicity test and sterility test to ensure product quality. In comparison with similar quality products in the world. The Gongdong petri dish series is suitable for cell, bacteria culture and drug sensitivity test.

Nursing plastic ware

SYSTEM

Gongdong's Vaginal Speculum got FDA approved without any defect. The products are sold well in the United States and other countries. The product design is delicate, humanized and simple to operate. A variety of different specifications of Dressing Cups are suitable for all ages, all kinds of medicine, convenient and clean. All kinds of PP plastic tweezers adopt connecting lever design, more excellent performance, can meet different working requirements.

Centrifuge tubes & Racks

SYSTEM

Centrifuge tube series are made of polypropylene with high quality. The thickness of the tube wall is uniform. The tubes are all marked with scales so that the volume of concentrated liquid can be directly read out, and make it easier to recycle concentrated liquid with straw. The unique sealing cover prevents liquid leakage, and can be sterilized in high temperature and pressure. Match with a variety of centrifuge tube holders.

Pipette tips & Boxes

SYSTEM

The special Gongdong pipette tip is used to ensure the accuracy and precision of the experiment. The precision pipette tip provides optimum reproducibility and accuracy. Standard tip and tip with filter can be disinfected and sterilized in high pressure. The unique filter element silicified tip does not hang the residual liquid, which guarantees the accuracy of liquid transfer to the utmost. It almost meets and fits the requirements of most commercially available pipettes. It is also equipped with a variety of tip boxes.

Culture plate & pipettes

SYSTEM

The Gongdong culture plate adopts the most advanced surface treatment technology and manufacturing process of low-temperature polymer material at present in the world. A variety of series product such as cell culture flasks, cell culture plates, isotope flasks and coplin jars can be produced to meet the needs of single cell to large-scale cell and tissue cultures in a 100 thousand stage purification plant.

Plastic pipette fills the fragile defect of glass tube and ends the history of glass tubes and rubber plug for the transfer of high-risk contagiousness liquids. The interior of the pipette is smooth and reduces the damage to the tissue structure and cell in the liquid. It can transfer the liquid sample safely, rapidly and quantitatively.

It is resistant to low temperature and can be sterilized at high temperature.

Test tubes & Racks

SYSTEM

The Gongdong test tube series is made of material PP、PS. It is transparent, smooth and high chemically tolerant. Among them, the test tube made of material PP is resistant to weak acid, weak base, organic solvent and high temperature, which can offer various specifications, flat bottom, round bottom, and various lengths.

Cuvettes

SYSTEM

The Gongdong colorimetric cup series adopts imported optical plastics, and is casted with high precision mould. The inside and outside surface of the product is transparent, level and smooth with superior light transmission performance. It is suitable for all kinds of automatic biochemical analyzer, blood coagulation instrument and spectrophotometer at home and abroad.
